The ICDA Five Steps of Proactive Career Development

The world of work is changing at an ever-increasing pace. Our clients will need to prepare for multiple career decision-making “forks in the road” over their lifetimes. These decision-making moments will sometimes happen at the most inopportune times. Initially, ICDA created the Five Steps of Proactive Career Development to help address our purpose to promote career development to all people over the lifespan in the state of Illinois. We now offer these steps as a framework for our clients to follow in their efforts to be prepared to face those forks, whenever they may present themselves.
